[Sportsman's Drifter](#)

Just wanted to drop you a quick note and let you know the boat I purchased from you was just what I was looking for. It is a great boat for 2 guys, and I wouldn't change a thing. It rowed wonderfully and the anchor systems were easy to use even with only one hand available (because I was playing a fish with the other hand). I am convinced I caught more fish because of the boat. In one and a half days of fishing I hooked 39 steelhead! The boat was light enough for 2 guys to pick up and will be great for getting into some of the places I fish that are a short walk from the road or don't have a boat ramp. Thanks again for everything and if I ever need another boat I know where to go.

Dave Pemberton

[Low Profile Pro Series](#)

I just wanted to tell you how much I have enjoyed my Hyde drift boats. I have had 3 fiberglass low-profile boats over the past 10 years and have loved each one.

I started by purchasing a used boat directly from you back in 1999, and a few year later traded up for another used boat. I made the move to a new boat about 4 years ago when I purchased my low profile Pro-series boat and had it set up just the way I wanted it.

I live in Michigan and fish the Pere Marquette river most often. Since we are in and out of the boat quite a bit the low profile boat is a perfect fit. The boat is a dream to row through tight spots, fallen trees and around boot fisherman in the river. I guide during the King Salmon season and get nothing but complements on the comfort and function of the boat. The built in rod holders have been a dream come true for keeping
