planned on fishing that day. We have a new [Hyde Rock Mountain Skiff Boat](#) we are making and we wanted to get Klay's expert advice on the boats performance and the fishing features inside the boat. We were a little dishearten to hear they had just raised the river from 10,000 CFS to over 14,000 CFS overnight. But we decided to go float anyway. To our surprise we started catching fish and it didn't stop till we hit the boat ramp at Conant Valley. Klay said the boat set very high on the water and even with the very high and fast water it handled great. I really enjoyed spending the day with Klay and Jake. Thanks so much for your help and input on the new boat. This is what helps keep our boats at their very best.

Sincerely,
Steve Hyde
